Vrije wil

Pragmatische vraag:

welk verschil wil je dat vrije wil maakt?

*Toeval is
logisch*

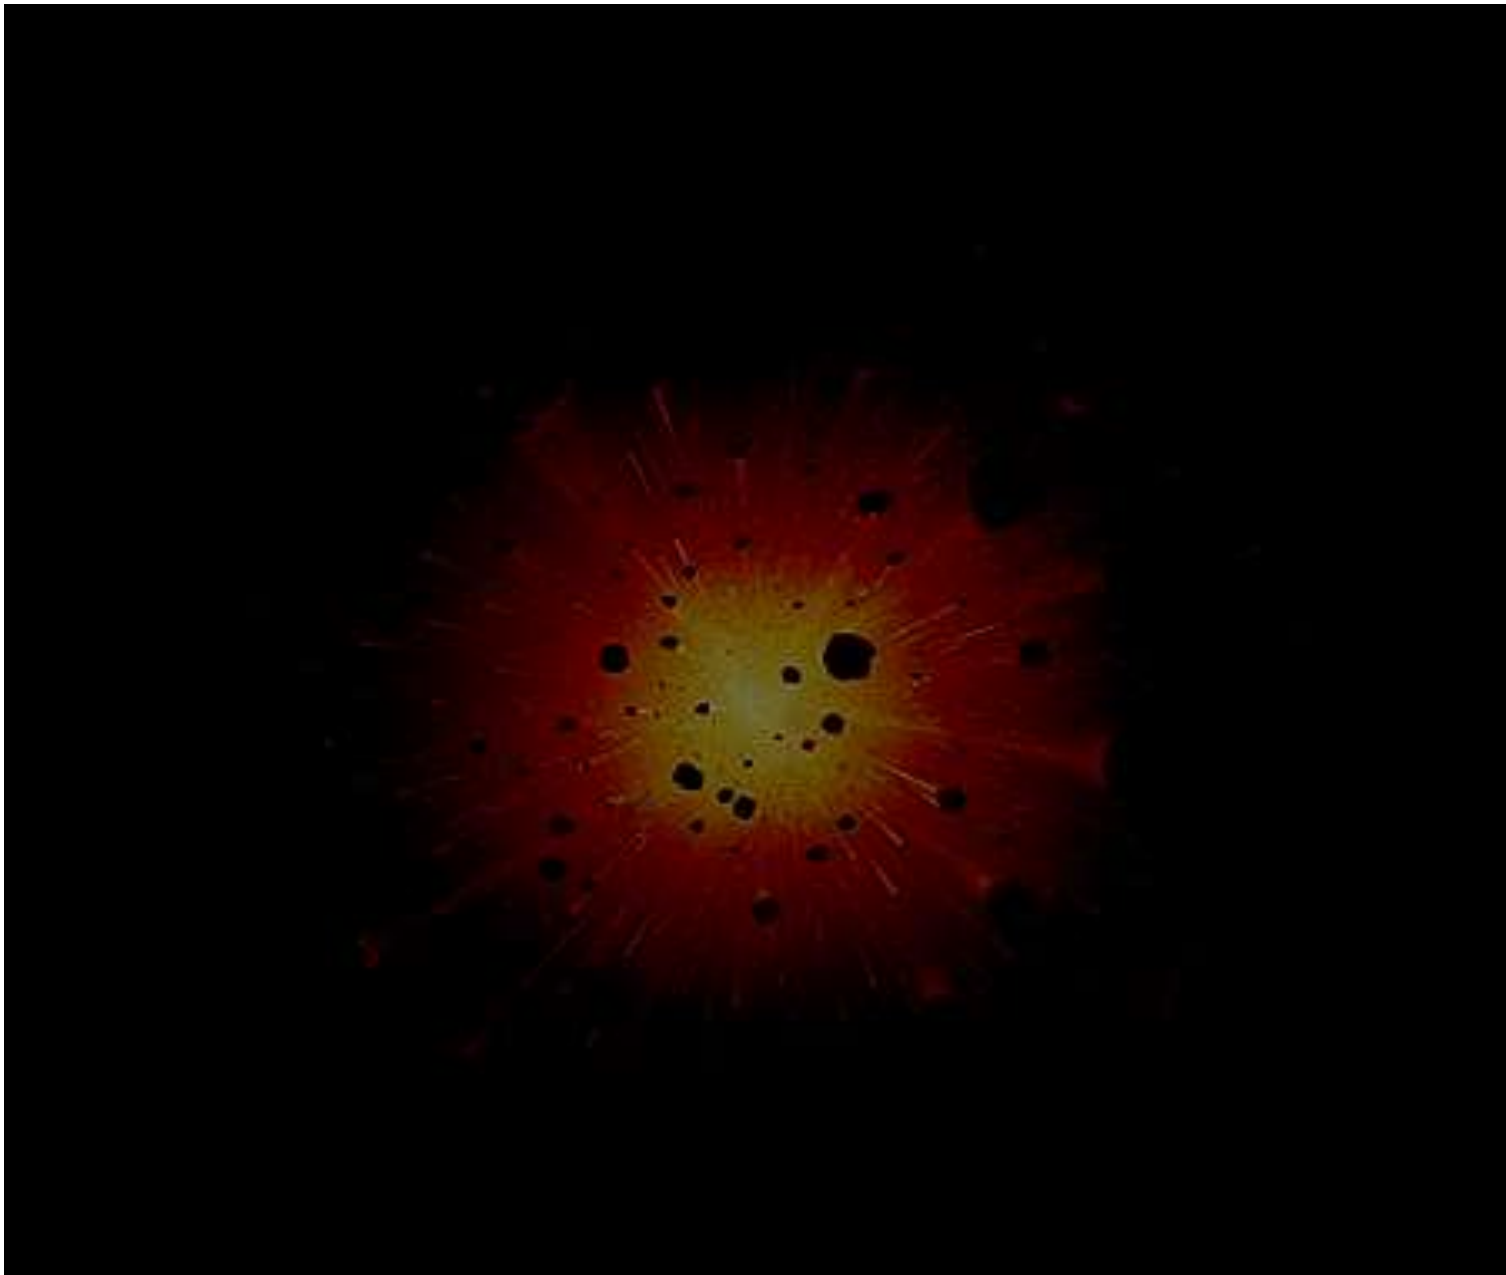

Determinism.

The perception that all events, including those of human thought, are causally determined by an unbroken chain of prior events.

Emil Cioran, 1952

Je bent vrij als je kunt doen

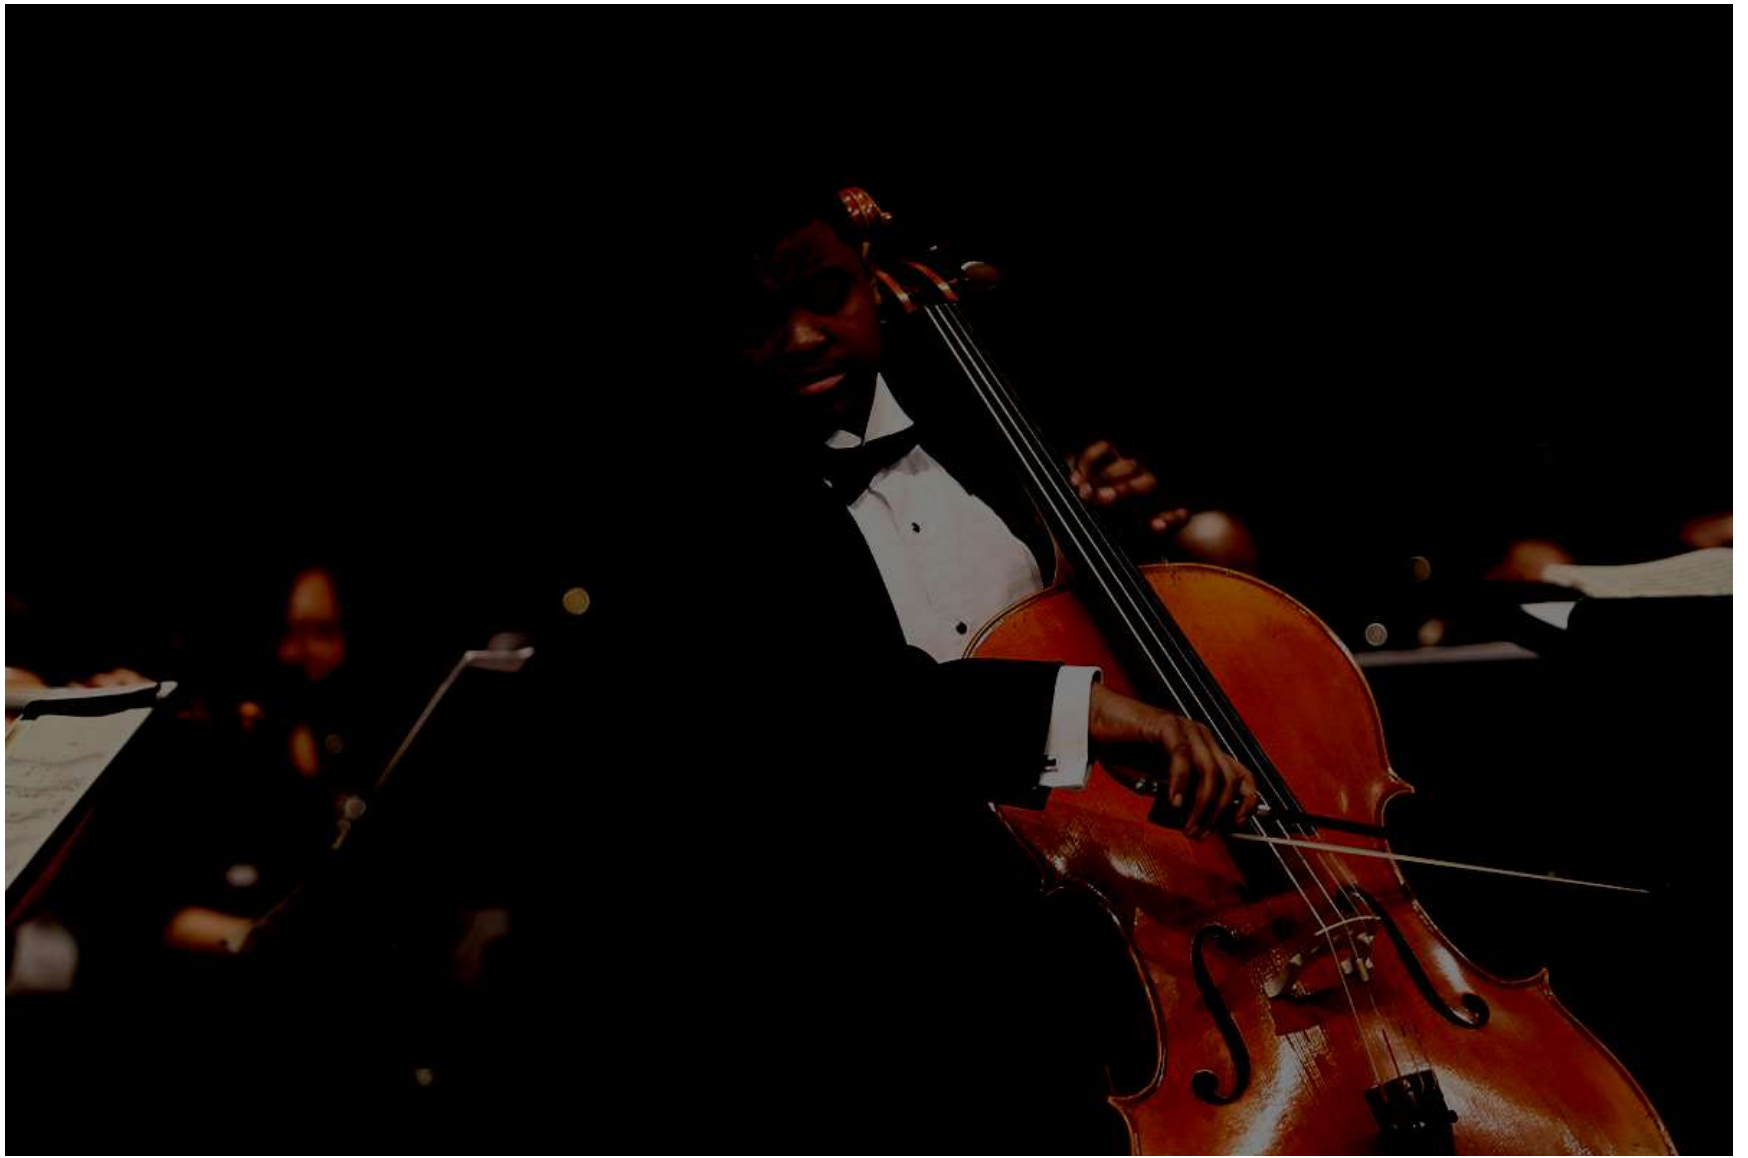

(en doet)

wat past bij wie je wilt zijn

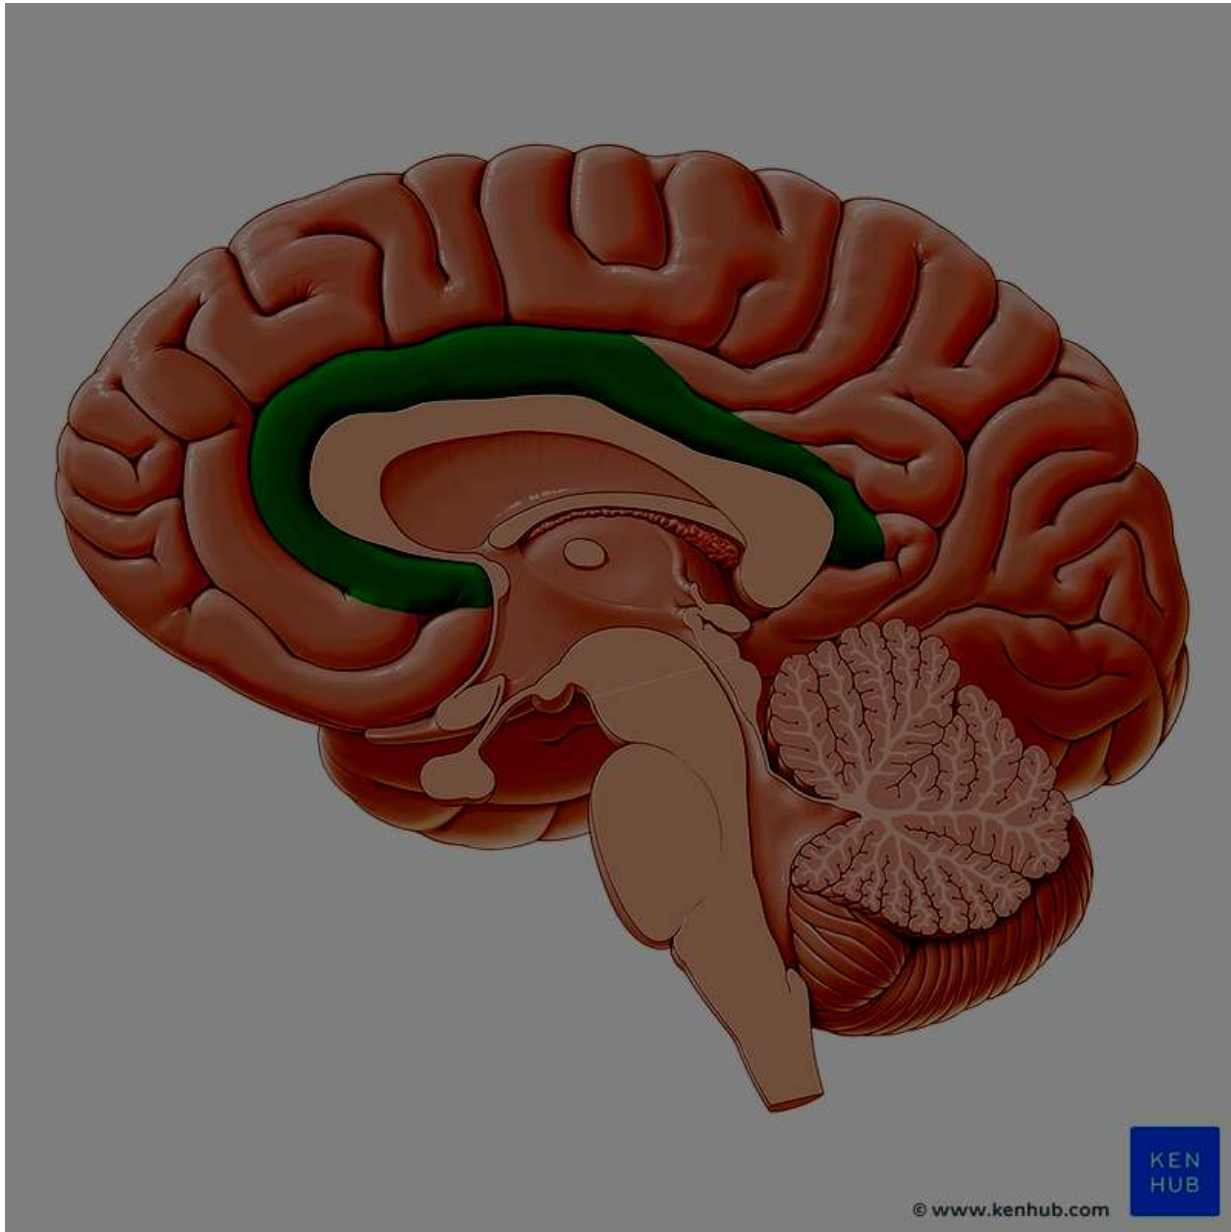

John Berger

‘Not all desires lead to freedom, but freedom is the experience of a desire being acknowledged, chosen and pursued.’

Wanting now, 2006

Waarderen = versterken

In onze hersenen lijken de systemen die impulsen *versterken* en de systemen die impulsen *waarderen* samen te vallen (in de gyrus syngularis).
